

Types of Quilting

Edge-to-Edge or All-Over

Many new designs are available to add a wonderful custom touch and texture to your quilt. Edge-to-Edge and All-Over designs work well with busy scrap quilts, strong geometric mosaic quilts, and others. Many themes are available to finish your theme fabric quilt. Prices vary according to size and intricacy of pattern chosen. Hundreds of designs are available.

All-Over Design is completed working from front of machine. The longarm quilter covers the entire quilt with freehand designs. A mixture of patterns can be used or one pattern repeated over and over. Even spacing gives a balanced design on the quilt.

Custom

Each element of the quilt (block, border, sashing, appliqué) is treated differently. This may employ stitch-in-the-ditch, meandering, stitching around appliqué, and freehand feathers. Ruler work is usually involved. Because it is more time consuming, the cost of custom quilting is greater than that of all-over quilting.
